7" Touch Screen Control System: TSCW-730

Access the Setup Screens

The "TSCW-730 Setup" menu is the starting point for configuring the TSCW-730 touch screen control system from Crestron®.

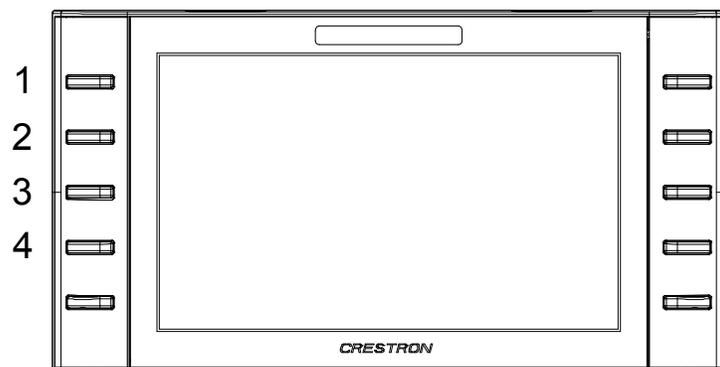

NOTE: If no project has been loaded or if an invalid project has been loaded, the screen displays a message saying "There is no display project to start...[Touch screen to enter setup.]".

The setup screens enable basic configuration procedures prior to regular operation of the touch screen.

During regular operation of the touch screen, there are two ways to activate the setup functions:

1. Place a button on the project main page and assign the reserved join number (17242) that activates setup.
2. If the optional hard key buttons have been installed, press hard keys 1, 2, 3, and 4, on the left side of the touch screen display, in sequence twice (press 1, 2, 3, 4, 1, 2, 3, 4) within a 5 second period.

Button Numbering

The main setup menu is displayed.

“TSCW-730 Setup” Menu

The “TSCW-730 Setup” menu is comprised of buttons for **Ethernet Setup**, **Audio Setup**, **Display Setup**, **Application Setup**, **Standby Timeout** and **Diagnostics**. In addition, there is an **About** button that provides information about the touch screen and a **Save & Exit** button. The functions of each are detailed in the next section of this guide.

Configure the TSCW-730

Ethernet Setup

On the “TSCW-730 Setup” menu, touch **Ethernet Setup** to display the “Ethernet Setup” menu.

“Ethernet Setup” Menu

The “Ethernet Setup” menu displays current settings, such as whether DHCP is on or off, the touch screen’s *Hostname* and its *IP Address*. There are controls for turning *DHCP On* or *Off* as well as controls which allow editing of the *Hostname* and *IP Address*. This menu also contains a *Link* indicator to show the status of the Ethernet connection. Other controls on this menu are explained in paragraphs that follow.

To edit the *Hostname*, touch **Edit** on the right side of the menu. The “Edit Hostname” screen opens with its on-screen keyboard.

“Edit Hostname” Screen with On-Screen Keyboard

Use the keyboard to enter the new name. Touch **Clear** to clear any previous entry, **Save** to save a new entry or **Cancel** to return to the previous screen.

To edit the *IP Address*, touch **Edit** on the right side of the “Ethernet Setup” menu. The “Edit IP Address” screen opens with its on-screen numeric keyboard.

“Edit IP Address” Screen with On-Screen Numeric Keyboard

Use the keyboard to enter the new IP address. Touch **Clear** to clear any previous entry, **Backspace** to delete the last digit, **Enter** to save a new entry or **Cancel** to return to the previous screen.

Touch the ellipsis (...) at the top of the “Ethernet Setup” menu to display additional Ethernet parameters and the controls which allow their entry.

“Ethernet Setup” Menu (Additional Parameters)

The additional parameters are *Subnet Mask*, *Default Router*, *Mac Address* and *Domain*. For *Subnet Mask*, *Default Router* or *Domain*, touch **Edit** on the right side of the menu to open on-screen keyboards like the ones described above.

After all new settings have been made, touch **Reboot** at the bottom of the “Ethernet Setup” menu to reboot the touch screen, so the new settings can take effect.

Touch **Advanced Settings** to display the “Advanced Ethernet Setup” menu.

“Advanced Ethernet Setup” Menu

The “Advanced Ethernet Setup” menu provides controls for enabling or disabling *SSL* (Secure Sockets Layer, a protocol for encrypting information over the Internet) and for editing the *CIP Port*, *Secure CIP Port*, *CTP Port* and *Secure CTP Port*.

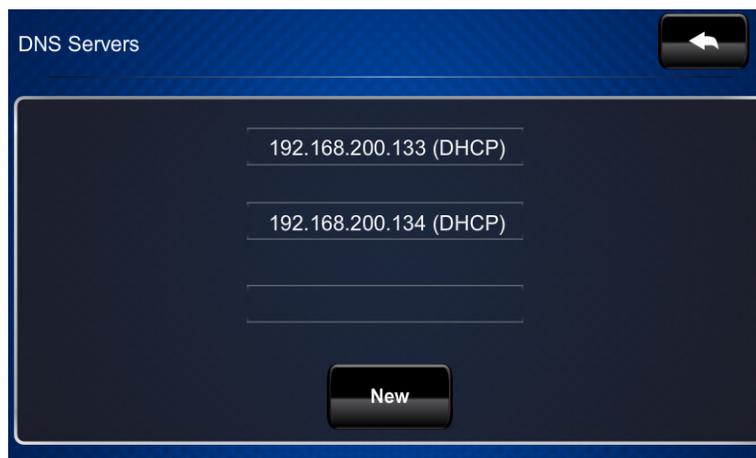

The *SSL* controls work as follows:

- **Off** disables the *SSL* capabilities of the TSCW-730
- **Self** sets up self signing certificates
- **CA** uses an authority to assign the *SSL* certificates

NOTE: For more details on *SSL* settings, refer to the 3-Series Control Systems Reference Guide (Doc. 7150) at www.crestron.com/manuals.

To edit the *CIP Port*, *Secure CIP Port*, *CTP Port* or *Secure CTP Port*, touch **Edit** on the right side of the menu to open an on-screen keyboard like the ones described earlier in this guide.

Touch **DNS Servers** to display the “DNS Servers” screen.

“DNS Servers” Screen

The “DNS Servers” screen provides controls for adding or deleting the IP addresses of *DNS* (Domain Name System) registered computers on the network. To add a server’s IP address, touch **New** to open an on-screen keyboard.

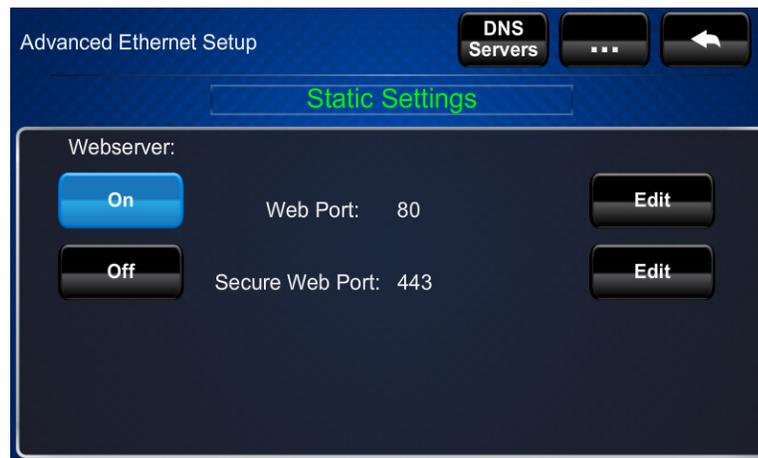

Use the keyboard to enter the IP address of the new DNS server. Touch **Clear** to clear any previous entry, **Backspace** to delete the last digit, **Enter** to save a new entry or **Cancel** to return to the previous screen.

On the “Advanced Ethernet Setup” menu, touch the ellipsis (...) at the top to display the **On** and **Off** controls which allow enabling or disabling the *Webserver* and for editing the *Web Port* and *Secure Web Port*.

The default *Webserver* setting is **On**. Touching **Off** disables access to setup from a Web browser.

To edit the *Web Port* or *Secure Web Port*, touch **Edit** on the right side of the screen to open an on-screen keyboard like the ones described earlier in this guide.

“Advanced Ethernet Setup” Menu (*Webserver*)

Touch  to return to the main “Ethernet Setup” menu.

On the “Ethernet Setup” menu, touch **Ethernet Diagnostics** to display the “Ethernet Diagnostics” screen.

“Ethernet Diagnostics” Screen

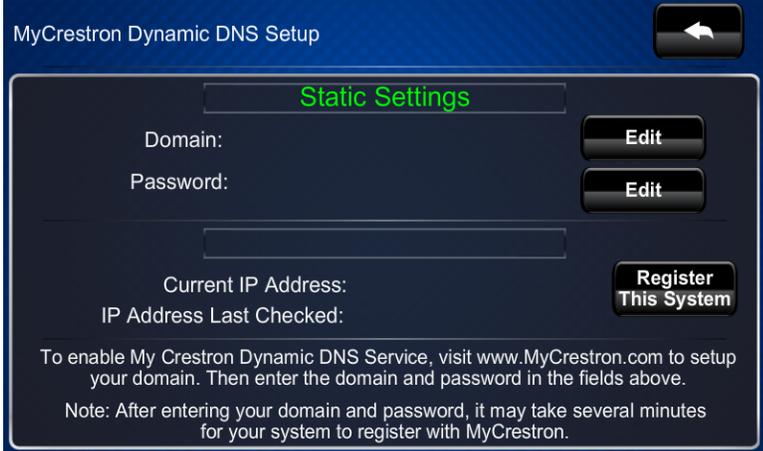

The “Ethernet Diagnostics” screen provides controls for verifying connections. Touch **Ping Default Router** to verify connection to the router. (The screen displays a “Passed” message to show successful connection.) Touch **Ping Crestron.com** to verify connection to an external DNS server.

Touch **Who** to display a list of devices connected to the touch screen via the Ethernet connection. These devices may be Crestron Ethernet devices, third-party Ethernet devices or PCs (including any PC using Crestron Toolbox™ to connect to the processor via Ethernet).

Touch  to return to the “Ethernet Setup” menu.

On the “Ethernet Setup” menu, touch **MyCrestron Dynamic DNS** to display the “MyCrestron Dynamic DNS Setup” screen.

“MyCrestron Dynamic DNS Setup” Screen

To use MyCrestron Dynamic DNS, use a PC with Internet Explorer® to navigate to www.mycrestron.com and register a system with Crestron.

With the information provided from the MyCrestron home page, complete the information on the “MyCrestron Dynamic DNS Setup” screen. To enter the *Domain* and *Password*, touch **Edit** on the right side of the screen to open an on-screen keyboard like the ones described earlier in this guide. Then touch **Register This System**.

Touch  to return to the “Ethernet Setup” menu.

Touch  again to return to the “TSCW-730 Setup” menu.

Audio Setup

On the “TSCW-730 Setup” menu, touch **Audio Setup** to display the “Audio Setup” screen.

“Audio Setup” Screen

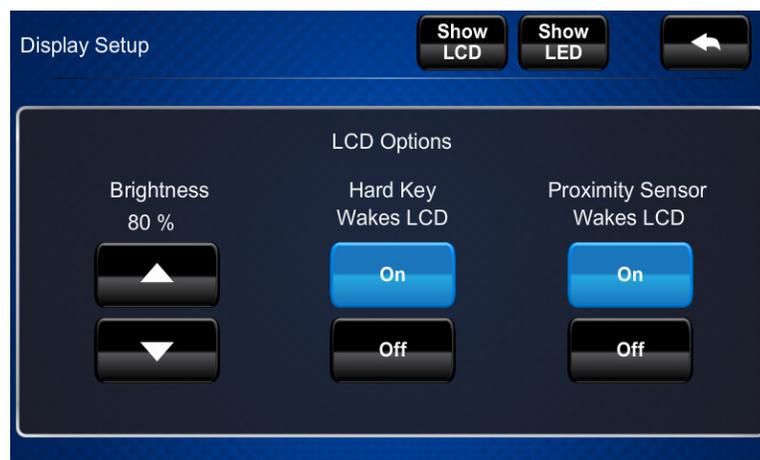

The “Audio Setup” screen provides controls for muting (or unmuting) the audio and adjusting the level for both *Master Volume* and *Media Volume*, as well as a control for playing a test .wav file. The *Media Volume* controls adjust H.264 streaming media level in relation to the *Master Volume* controls.

Touch  to return to the “TSCW-730 Setup” menu.

Display Setup

On the “TSCW-730 Setup” menu, touch **Display Setup** to display the “Display Setup” screen showing *LCD Options*.

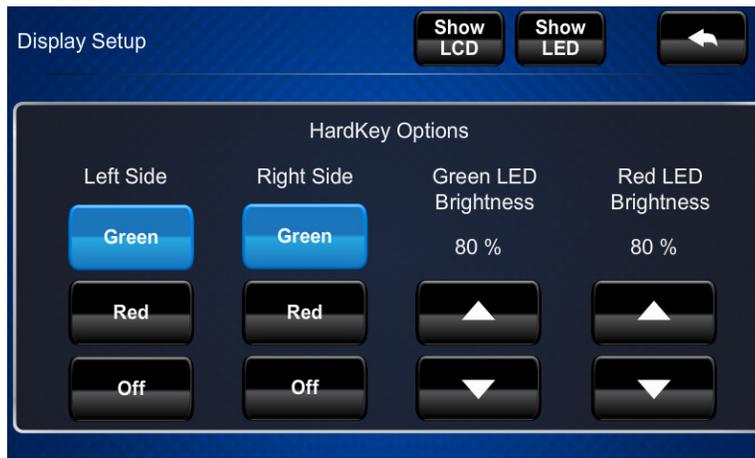

“Display Setup” Screen (*LCD Options*)

The *LCD Options* include controls to adjust screen *Brightness* along with **On** and **Off** controls for *Hard Key Wakes LCD* and *Proximity Sensor Wakes LCD*.

Touch **Show LED** to display the *Hardkey Options* controls.

“Display Setup” Screen (Hardkey Options)

The *Hardkey Options* include controls to set the color of the *Left Side* and *Right Side* hard key LEDs (either **Green** or **Red**) or to turn the hard key LEDs **Off**. There are also controls to adjust *Green LED Brightness* and *Red LED Brightness*.

Touch  to return to the “TSCW-730 Setup” menu.

Application Setup

On the “TSCW-730 Setup” menu, touch **Application Setup** to display the “Application Setup” screen.

“Application Setup” Screen

The “Application Setup” screen has controls to enable the user program or disable the user program from running when the device boots, and to restart the program.

Touch **Register** to enable the user program to load when the touch screen boots. The control text changes to **Unregister**. Touch **Unregister** to prevent the program from loading when the touch screen boots. The control text reverts to **Register**.

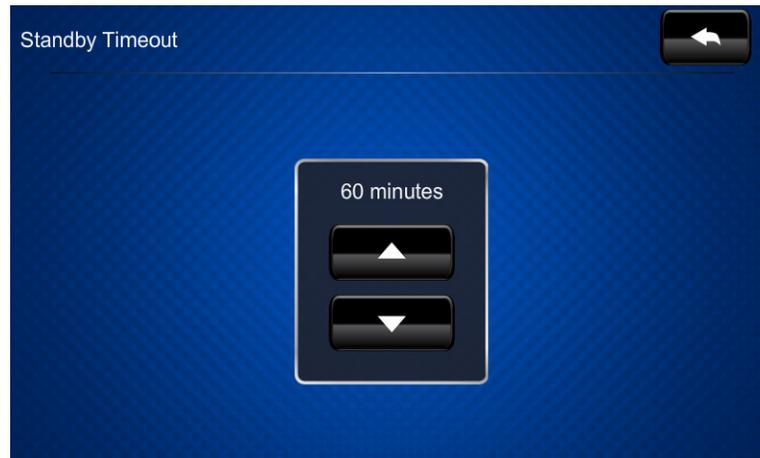

Touch **Start** to start the program. The control text changes to **Stop**. Touch **Stop** to stop the program. The control text reverts to **Start**.

Touch  to return to the “TSCW-730 Setup” menu.

Standby Timeout

On the “TSCW-730 Setup” menu, touch **Standby Timeout** to display the “Standby Timeout” screen.

“Standby Timeout” Screen

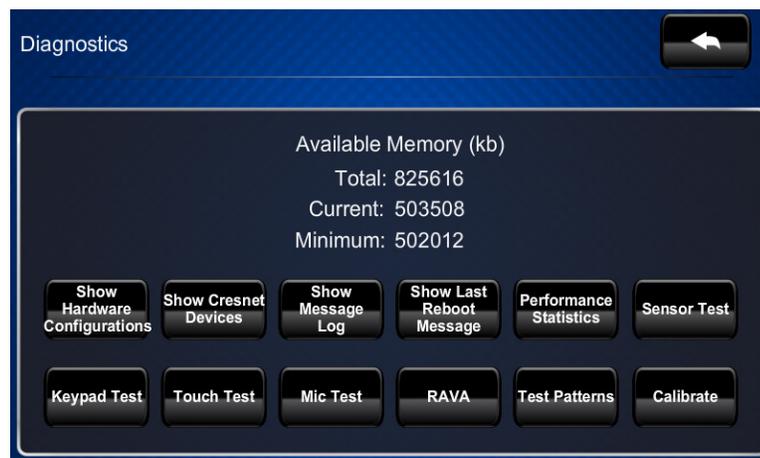

The “Standby Timeout” screen provides controls to adjust standby timeout from 0 to 120 minutes.

Touch  to return to the “TSCW-730 Setup” menu.

Diagnostics

On the “TSCW-730 Setup” menu, touch **Diagnostics** to display the “Diagnostics” menu.

“Diagnostics” Menu

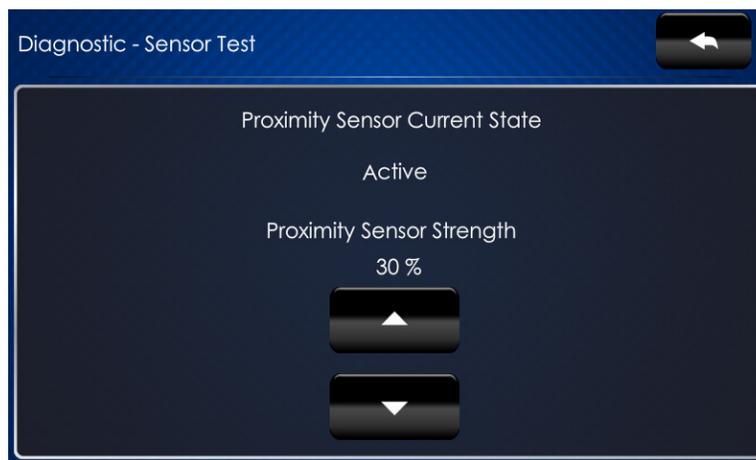

The “Diagnostics” menu displays the *Available Memory* and contains controls to **Show Hardware Configurations**, **Show Cresnet Devices**, **Show Message Log**, **Show Last Reboot Message** and **Performance Statistics**. In addition there are

controls to open various test screens and to initiate touch screen calibration. These are explained in the paragraphs that follow.

Sensor Test

On the “Diagnostics” menu, touch **Sensor Test** to display the “Diagnostic – Sensor Test” screen.

“Diagnostic – Sensor Test” Screen

The “Diagnostic – Sensor Test” screen indicates the current state of the proximity sensor (*Active* or *Inactive*) and provides controls to adjust *Proximity Sensor Strength*.

Touch  to return to the “Diagnostics” menu.

Keypad Test

On the “Diagnostics” menu, touch **Keypad Test** to display the “Diagnostic - Keypad” screen.

“Diagnostic – Keypad” Screen

The “Diagnostic - Keypad” screen can be used to test the function of the hard key push buttons on either side of the screen. When a button is pressed, its corresponding indication on the screen lights.

Touch  to return to the "Diagnostics" menu.

Touch Test

On the "Diagnostics" menu, touch **Touch Test** to display the touch test screen.

Touch Test Screen

The touch test screen can be used to test the function of the screen. When a location button is touched, its indication on the screen lights. This screen also contains a **Calibrate** button to initiate touch screen calibration.

During touch screen calibration, a crosshair appears at the center of the screen. Touch the center of the crosshair, which then moves to the upper left part of the screen. Touch the center of the crosshair and it moves to another part of the screen. Continue touching the center of the crosshair until calibration is complete.

NOTE: When touching the screen during calibration, be as accurate as possible.

Touch  to return to the "Diagnostics" menu.

Mic Test

On the "Diagnostics" menu, touch **Mic Test** to begin a microphone test. The touch screen records audio for five seconds and then plays back the recorded sound.

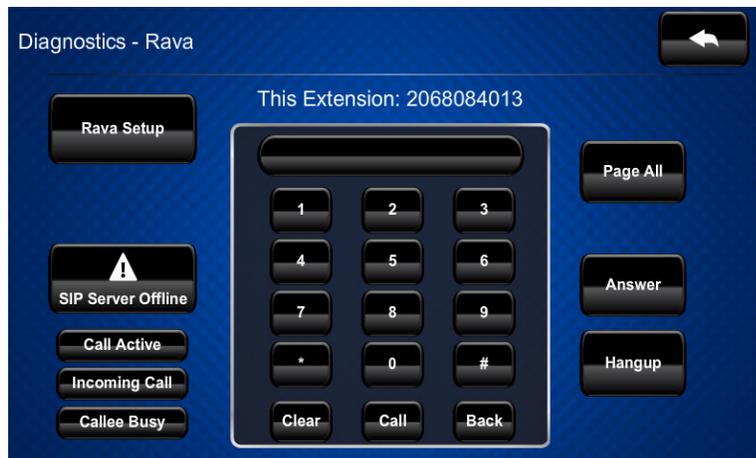

The built-in microphone is used to record audio and play it back to confirm the microphone is functioning. When playback is finished, the display returns to the "Diagnostics" menu.

Touch  to return to the "TSCW-730 Setup" menu.

RAVA

On the “Diagnostics” menu, touch **RAVA** to display the “Diagnostics - Rava” screen.

“Diagnostics - Rava” Screen

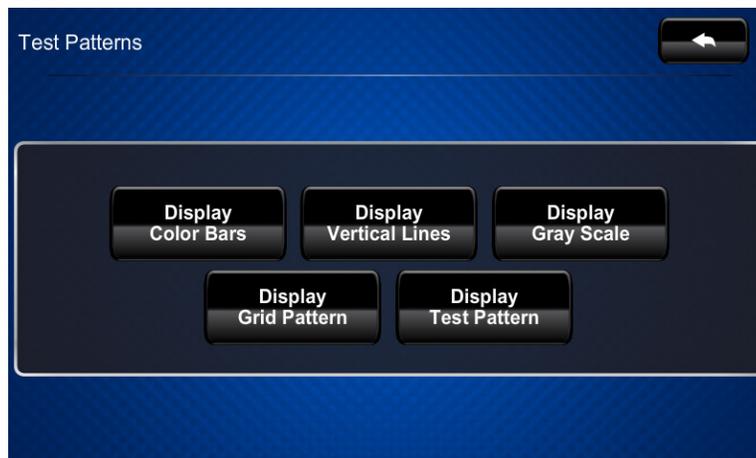

The “Diagnostics – Rava” screen provides controls for testing the use of Crestron’s Rava® SIP Intercom with the TSCW-730. They can be used to test projects and settings. If the intercom works but the project does not, there is an issue with the project. If the intercom does not work, there is an issue with the settings.

Touch  to return to the “Diagnostics” menu.

Test Patterns

On the “Diagnostics” menu, touch **Test Patterns** to display the “Test Patterns” menu.

“Test Patterns” Menu

The “Test Patterns” menu contains buttons for selecting the different available test patterns: **Display Color Bars**, **Display Vertical Lines**, **Display Gray Scale**, **Display Grid Pattern** and **Display Test Pattern**.

Touch  to return to the “Diagnostics” menu.

Calibrate

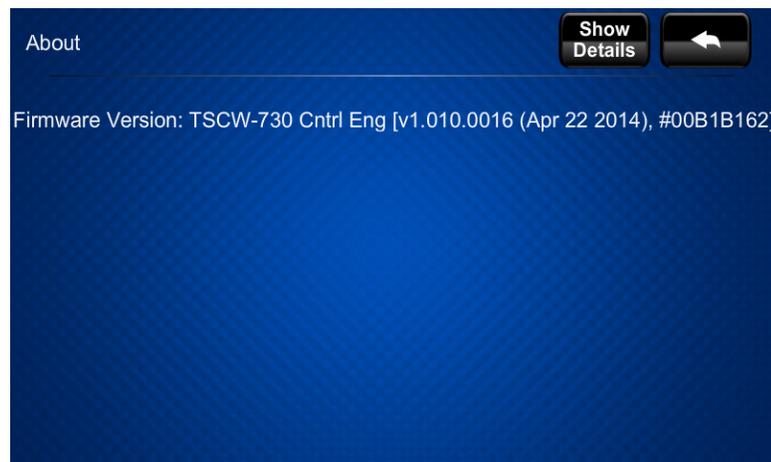

On the “Diagnostics” menu, touch **Calibrate** to initiate the screen calibration procedure. Refer to “Touch Test” on page 12 for details.

Touch  to return to the “TSCW-730 Setup” menu.

About

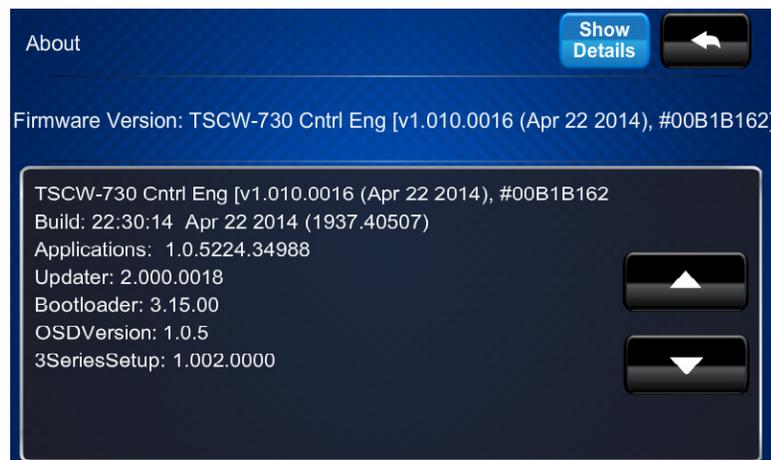

On the “TSCW-730 Setup” menu, touch **About** to display the “About” screen.

“About” Screen

The “About” screen displays information about the firmware in the unit. Touch **Show Details** to display more information, shown in the following illustration.

“About” Screen (Details)

Touch  to return to the “TSCW-730 Setup” menu.

Save & Exit

On the "TSCW-730 Setup" menu, touch **Save & Exit** to save all settings, exit the setup screens and return to the main project.
