DN-508S

8-INCH 3-WAY TRI-AMPLIFIED LOUDSPEAKER (SINGLE)

PRODUCT OVERVIEW

The DN-508S is a compact 3-way tri-amplified speaker capable of exceptionally high performance, suitable for a variety of roles. It is ideal for situations where no-compromise acoustic performance is needed, but where complicated setups and elaborate stacks of external equipment are not feasible or possible. It features studio-grade acoustics, luxurious aesthetics, and innovative proximity controls for flexible placement options. The 220-watt DN-508S provides clear, dynamic sound reproduction for mid- and small-size meeting and presentation spaces. Combining 1-inch silk dome tweeter, a 5-inch woven Kevlar midrange unit, and an 8-inch woven Kevlar woofer, it offers a dynamic, wide-range frequency response, even exceeding the performance of speakers found in world-class recording studios.

PRODUCT FEATURES

- Premium 3-way loudspeaker provides professional full-range audio reproduction
- Dedicated mid-range driver delivers exceptional vocal clarity
- Wide dispersion for use in meeting rooms, classrooms, and pro-audio applications
- 8-inch (203mm) Kevlar reinforced low-frequency driver
