

Nobo 4:3 Tripod Screen 1750x1325mm

Overview

If you are looking for a high quality yet affordable projection screen that can be moved around easily, set up in seconds and gives excellent viewing performance whether you're using a digital projector or OHP, then the free-standing Nobo Professional Tripod Screen is the ideal choice. Smart and contemporary yet stable and strong, it comes with a 1 year manufacturer's warranty so you can purchase with total confidence.

Versatile: the Nobo Professional Tripod Screen is ideal for businesses or educational establishments that need to move their projector equipment from room to room for ad-hoc meetings.

The 4:3 format is designed for use with a DLP®/LCD projector. It can also be used with a traditional OHP thanks to the overhead arm that tilts the screen towards the audience to eliminate the image distortion known as the 'keystone effect' and optimise picture sharpness.

Professional: the clean, contemporary design of this portable projection screen will add a stylish touch to any meeting room. The brilliant matt white screen provides a sharp, detailed image enhanced by the contrasting black border. Colours are crisp and the black and white contrast superb – essential to ensure business reports are legible.

Quick and easy: it takes just seconds to unfold the tripod base and pull the screen up from its housing before hooking it onto the overhead arm.

The screen is height adjustable: simply tighten the rear ratchet to hold it securely in your chosen position and keep the viewing surface taut and wrinkle-free. Raise or lower the screen to suit your audience, ensuring that everyone has a good view and can contribute to discussions for a memorable

Technical Specifications

• 4:3 format warranty for peace of mind
