HCS-5100Plus Series New Generation Digital Infrared Language Distribution System

Overview

In 2008, TAIDEN company has introduced successfully the digital infrared processing chip, and launched the world's first HCS-5300 Digital Infrared Conference System, and the HCS-5100 Digital Infrared Language Distribution System which conforms to the international standard for digital infrared. This system provides superb sound quality, that makes TAIDEN to be the world's leading conference system manufacturer.

Now, TAIDEN developed successfully the new generation digital infrared processing chip and launched HCS-5100Plus New Generation Digital Infrared Language Distribution System. This system supports at most 40 distributing channels which is the most advanced infrared language distribution system.

TAIDEN TDIR04 digital infrared processing chip
