- ✓ MAGIC MIRROR® Effect

Models

The BATHROOM MIRROR TV™ LINE redefines the bathroom mirror. It offers a complete solution for your bathroom mirror, with a fully integrated TV and speaker. The unique on-wall mounting system accompanying this product-line allows for a total installation depth of only 4cm. The BATHROOM MIRROR TV™ LINE is custom engineered for the harsh and damp bathroom environment. It is protected against humidity by a special casing, and is explicitly rated for operation in bathroom environments (IP X2 and IP X4 ratings). The various models of the BATHROOM MIRROR TV™ LINE offer integration of elegant lights and MAGIC MIRROR®, which when turned off renders the screen area completely invisible; leaving your bathroom with nothing but a stylish mirror. All models below can be customized and tailored for your specific needs. From mirror and glass options, screen size and positions, to light combination; our goal is to create the perfect BATHROOM MIRROR TV™ for you.

- 1 PURE ELEGANCE™ - Crystal Mirror and MIRROR IMAGE® LCD
- 2 PURE MAGIC™ - MAGIC MIRROR® and MIRROR IMAGE® LCD
- 3 PURE MAGIC CRYSTAL™ - MAGIC MIRROR® Crystal Clear and MIRROR IMAGE® LCD
- 4 SATIN LIGHT™ - Crystal Mirror, Lights, and MIRROR IMAGE® LCD
- 5 MAGIC LIGHT™ - MAGIC MIRROR®, Lights, and MIRROR IMAGE® LCD
- 6 MAGIC CRYSTAL LIGHT™ - MAGIC MIRROR® Crystal Clear, Lights, and MIRROR IMAGE® LCD

MAGIC MIRROR® EFFECT

ad notam® is the only Mirror TV manufacturer which owns its LCD and Glass manufacturing facilities. One of the most featured products manufactured in our facilities, located in the south of Germany, is the patent-protected MAGIC MIRROR® technology. With MAGIC MIRROR® as part of your BATHROOM MIRROR TV™, **ad notam®** delivers the highest standard of picture quality when turned on, while when turned off, the screen area completely disappears behind the MAGIC MIRROR®, leaving your environment with nothing but an elegant mirror fixture.

RADIO-FREQUENCY REMOTE CONTROL

The **ad notam®** Radio Frequency Remote Control does not require a visibly distracting Infra-Red eye on the mirror, as well prevents the signal from bouncing back from the mirror surface.
