

Architectural Series Faceplates: B-G1-FPAR

Description

Architectural series faceplates complement any CNX-B series keypad perfectly to deliver functional control with an alluring and distinctive style ideally suited to today's contemporary interiors. Elegantly crafted of aluminum, Architectural series faceplates are offered in a variety of luxurious finishes. (Refer to the table below.)

Use the following procedure to install the faceplates on single-gang keypads. (Refer to the illustration below.)

NOTE: Since the divider and the removable buttons are loose and can fall off when removing the faceplate, record the button arrangement so they can be repositioned properly when installing the new faceplate.

1. To replace an existing faceplate, use a small screwdriver inserted in the notch at the bottom of the faceplate to unsnap it from the keypad.
2. Attach buttons with LED window oriented upward to match each LED indicator.
3. Attach divider and faceplate (orient with notch at bottom). Make sure faceplate snaps in position.
