

M67

Dynamic handheld microphone

The M67 is a fully-featured, dynamic general-purpose microphone for the budget-conscious performer who wants style, audio quality and a product that works hard. It is solidly constructed, with a robust grill to protect the diaphragm against rough handling and is suited for indoor as well as outdoor use. The high sensitive neodymium element makes it the perfect microphone for presentations and singers. Due to the unidirectional (super-cardioid) polar pattern, the feedback is reduced to a strict minimum.

Applications:

- Education
- Live performances

System specifications:

Microphone	Type	Dynamic
Frequency	Response (± 3 dB)	50 Hz - 18 kHz
Sensitivity (1W/1m)		-75 dB
Impedance		300 Ω
Connectors		3-pin XLR
