

8-Port PoDM Power Supply for DM 8G+® I/O Cards

- > Provides a centralized power source for up to 8 PoDM powered devices
- > Designed for use with any card-based DigitalMedia™ switcher with DM 8G+® I/O cards installed
- > Compatible with PoH powered HDBaseT® devices
- > Includes front panel indicators for easy troubleshooting
- > Single-space 19" rack-mountable

Power over DM® (PoDM) is a feature of Crestron® DigitalMedia 8G+® technology that enables operating power for DM 8G+® transmitters and receivers to be carried alongside video, audio, and data signals over a single CAT5e cable. As part of a complete DM system, PoDM can be used to deliver a centralized power distribution solution for a facility full of transmitter and receiver devices, eliminating all the bulky power packs and reducing the number of AC power outlets normally required at every device location.

The DM-PSU-8 provides power for up to eight PoDM powered devices. It is designed to install at the central switcher location, occupying just a single rack space and requiring just one AC power outlet. Each of its eight POWER ports connects to the POE IN port^[1] of a [DMC-4K-C](#) input card, [DMC-4K-C-DSP](#) input card, or [DMC-4K-CO-HD](#) output card. A full 15.4 Watts is supplied by each port to handle eight Class 0-3 PoDM devices simultaneously. Connections between the DM-PSU-8 and switcher are made using ordinary CAT5e cables terminated with RJ45 connectors (not included). Front panel LEDs indicate when each port is supplying power to a PoDM powered device.

The DM-PSU-8 is also compatible with HDBaseT® specifications, and may be used to power PoH (Power over HDBaseT) powered devices that are connected to the DM switcher in the same manner as a PoDM powered device. PoDM is intended specifically for use with DM 8G+ based systems.

Note: The DM-PSU-8 is not compatible with PoDM+, and is not capable of supplying power to PoDM+ powered devices. For applications requiring a PoDM+ PSE, use the Crestron [CEN-SWPOE-16](#) or similar 802.3at Type 2 Class 4 compliant PoE+ PSE.

SPECIFICATIONS

Indicators

PWR: (1) green LED, indicates operating power is supplied via the main power input

POWER 1 – 8: (8) green LEDs, each indicates PoDM is active and a PoDM (or PoH) powered device is connected to the corresponding port (via a DMC-Series DM 8G+® I/O card)

Connectors

POWER MAX 15.4W/PORT 1 – 8: (8) 8-wire RJ45, female; PoDM and PoH PSE (Power Sourcing Equipment) ports; Each port connects to the POE IN port^[1] of a DMC-Series DM 8G+ I/O Card; Each port supports one PoDM/PoH PD (Powered Device) up to 15.4W (Class 0-3)

100-240V~50/60Hz 2.2-1.0A: (1) IEC 60320 C14 main power inlet; Mates with removable power cord, included

G: (1) 6-32 screw, chassis ground lug

Power Requirements

Main Power: 2.2-1.0 Amps @ 100-240 Volts AC, 50/60 Hz

Environmental

Temperature: 32° to 104°F (0° to 40°C)

Humidity: 10% to 90% RH (non-condensing)

Heat Dissipation: 97 BTU/Hr

Enclosure

Chassis: Metal, black finish, fan-cooled, vented sides

Faceplate: Metal, black finish with polycarbonate label overlay

Mounting: Freestanding or 1U 19-inch rack-mountable (adhesive feet and rack ears included)

Dimensions

Height: 1.73 in (44 mm)

Width: 17.28 in (439 mm);

19.00 in (483 mm) with ears

Depth: 6.56 in (167 mm)

Weight

3.8 lb (1.8 kg)
